

# ವೈDHಯಾ (Vaidhya)

Database Metadata and Configurations

This Document Contains all Details of the Database used in the Project  
ವೈDHಯಾ (Vaidhya).

**Database Used: Mongo DB (Atlas for Cloud Storage)**

**Database Name: Vaidhya**

**Total Number of Collections: 11**

**Collections:**

appointment					
_id	name	patient_username	time_slot	mode	date
String	String	String	String	String	String

Stores the Details about the Scheduled Appointments.

"\_id": "karthik\_03-06-2024\_13:00 - 16:00 IST" (Dynamically Generated)

"name": "karthik" (Patient Name)

"patient\_username": "karthik"

"time\_slot": "13:00 - 16:00

IST" "mode": "online"

"date": "03-06-2024"

appointment_status				
_id	09:00-12:00 IST	13:00 - 16:00 IST	17:00 - 20:00 IST	customslot (00:00 - 00:00)
String	Int32	Int32	Int32	Int32

Stores the Details about the Appointment Status in a Particular Day for a Particular Slot.

"\_id": "mukuta-04-06-2024" (Doctor ID + Date of the Appointment)  
 "09:00 - 12:00 IST": 1 (Scheduled)  
 "13:00 - 16:00 IST": 1  
 "17:00 - 20:00 IST": 0 (Free)

doctor_login		
_id	email	password
String	String	String

Stores the Doctor Information for the Login Purpose.

"\_id": "mukuta" (Doctor Username)  
 "password": "mukuta@1234A"  
 "email":  
["mukutamanitd6@gmail.com"](mailto:mukutamanitd6@gmail.com)

consultation	
_id	doctor_id
String	String

Stores the Details about the Patient - Doctor Mapping.

"\_id": "karthik" (Patient ID)

"doctor\_id": "mukuta" (Doctor ID)

patient_login		
_id	email	password
String	String	String

Stores the Patient Information for the Login Purpose.

"\_id": "karthik" (Patient Username)

"password": "Admin@1234"

"email": "karthikclgid@gmail.com"

data								
_id	age	symptom-feel	symptom-test	key	patientid	patientname	doctor_name	doctor_id
String	Int32	String	String	String	String	String	String	String

Stores the Details about the Patient Health and the key used by the doctor to fetch Patient Health Details.

"\_id": "karthik" (Patient Username)

"age": 21

"symptom-feel": "Depression"

"symptom-test": "Obsessive-Compulsive Disorder (OCD)"

"key": "doc1" (Key to be Used by the Doctor)

"patientid": "karthik"

"patientname": "karthik"

"doctor\_name": "Dr.Mukuta"

"doctor\_id": "mukuta"

doctor_info													
_id	doctor_username	DOB	age	address	blood_group	ph_number	email	doctor_name	room	location	consultation_address	licence_number	aadhar
String	String	String	Int32	String	String	String	String	String	String	String	String	String	String

Stores the Complete Details about the Doctor.

"\_id": "mukuta", (Doctor ID)

"doctor\_username": "mukuta", (Doctor username)

"DOB": "27-05-2004"

"age": 20

"address": "Mysuru"

"blood\_group": "A +"

"ph\_number": "+91

6361854179"

"email":

"[mukutamanitd6@gmail.com](mailto:mukutamanitd6@gmail.com)"

"doctor\_name": "mukuta"

"room": "101" (Consultation Room Number)

"location": " <https://maps.app.goo.gl/q8FVRqnfmT8sP6A> "

(Consultation Location)

"consultation\_address": "Mysuru"

"licence\_number": "XXXX"

"aadhar": "XXXXXXXXXXXX8"

patient_info								
_id	patient_username	DOB	age	address	blood_group	ph_number	email	patient_name
String	String	String	Int32	String	String	String	String	String

Stores the Complete Details about the Patient.

"\_id": "karthik"

"patient\_username": "karthik"

"DOB": "26-07-2003"

"age": 20

"address": "Mysuru"

"ph\_number": "+91

7795123170"

"email": "karthikclgid@gmail.com"

"patient\_name": "karthik"

"blood\_group": "A+"

otp		
_id	createdAt	otp
String	Date	Int32

Keeps Track of the OTP Generated for Verification.

"\_id": "karthikclgid@gmail.com" (Doctor or Patient Email)

"createdAt": {

"\$date": "2024-05-31T15:31:32.495Z" (Time at which OTP is generated)

K

"otp": 836302 (OTP)

\*OTP is Automatically Deleted after 10 Minutes

numbers	
_id	value
String	Int32

Keeps Track of the Number of Patients and Doctors.

(Only 2 Documents)

"\_id": "patient-register-number"

"value": 6 (Number of Patients)

"\_id": "doctor-register-number"

"value": 5 (Number of Doctors)

admin			
_id	password	email	email_app_password
String	String	String	String

Stores the Admin Information for the Login Purpose.

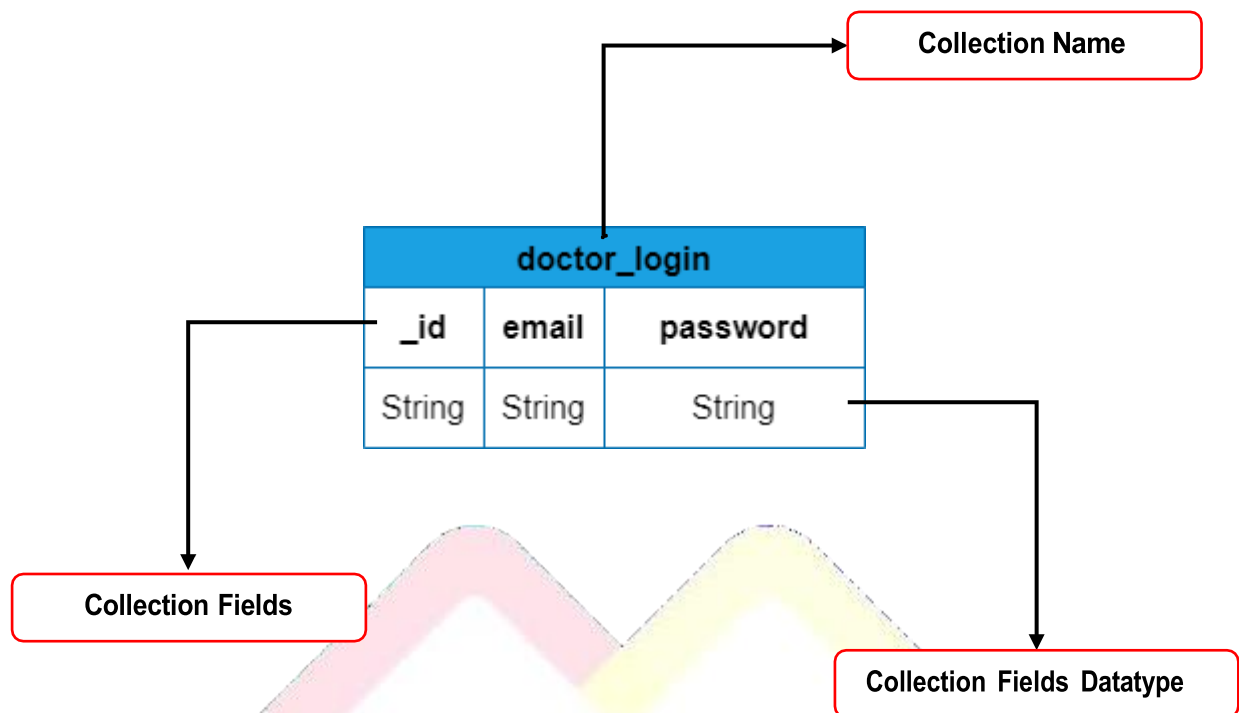

"\_id": "admin" (Admin Username)

"password": "Admin@1234"

"email": "[mukutamanit@gmail.com](mailto:mukutamanit@gmail.com)" (from which mails are sent)

"email\_app\_password": "Mukuta@2022" (Corresponding App Password)

## Collection Details:

To Get Start with Vaidhya, create the database using above details and use the Mongo DB Connection String in the config.ini file.

### Details to be included in config.ini :

STRING = <Mongo DB Connection String>

DATABASE\_NAME = Vaidhya

COLLECTION\_PATIENT\_LOGIN = patient\_login

COLLECTION\_DOCTOR\_LOGIN = doctor\_login

COLLECTION\_DATA = data

COLLECTION\_APPOINTMENT\_STATUS = appointment\_status

COLLECTION\_APPOINTMENT = appointment

COLLECTION\_PATIENT\_INFORMATION = patient\_info

COLLECTION\_DOCTOR\_INFORMATION = doctor\_info

COLLECTION\_CONSULTATION = consultation

OTP = otp

NUMBERS = numbers
